

## **Warranty Components Warranty**

Components manufactured and sold by National Electrostatics Corporation, hereinafter called NEC, are warranted to be free of defects in material and workmanship. Components are warranted for 12 months, with the warranty period beginning on the date of original shipment from NEC. NEC's obligation under this warranty is limited to repairing or replacing, at NEC's option, non-expendable parts. Expendable items are specifically excluded from this warranty and include, but are not limited to, lamps, filaments, fluids, V-belts, O-rings and ion source feed materials. Buyer shall contact NEC for shipping instructions prior to returning any item to NEC for repair or replacement under the conditions of this warranty. NEC assumes no liability under this warranty for system failures resulting from improper operation, improper preventive maintenance, abuse of or modifications to original system configurations.

This warranty is in lieu of all other warranties, expressed or implied, and constitutes fulfillment of all of NEC's liabilities to the purchaser. NEC does not warrant that any component can be used for any particular purpose other than that covered by NEC specifications. This warranty does not apply to NEC products or systems which have specific warranty statements of their own. NEC assumes no liability for consequential damages, anticipated or lost profits, incidental damages or loss of time or other losses incurred by the purchaser or any third party in connection with components covered by this warranty or otherwise. This warranty applies only to the original purchaser and is not transferable.
